## Solar Power

Rooftop Solar & Ground  
Mount Solar up to 500MW  
Utility Scale Systems

WHEN THE GRID GOES  
DOWN... SOLAR GOES DOWN.

This is to prevent back feeding the Grid and endangering Linemen.  
Our MicroGrid Systems keep Solar working.

## Solar HVAC

This market disruptive heat pump is the only one of its kind to use ambient light to compress the refrigerant gases without the compressor doing the work. This results in up to 90% savings on heating, 30%-50% savings on AC and maintains operations in extreme temperatures as low as -20F.

## Hydronic Applications

Utilizing the heat from the MCHP Unit, we can repurpose it to heat the water and the general areas of your facility. That means eliminating your heating and hot water expenses.

## Lighting & Automation

Programs are tailored to each individual application, and we offer no money down options. We can show you how your savings on utility and maintenance costs are greater than the cost of switching to an LED solution.
